NEWSLETTER MARCH 2024

Dear Berthholder,

Spring is almost upon us once more.

We have attempted to arrange the yard in order of launch, however, we understand that your plans may change and circumstances sometimes dictate the situation, But the launch season is approaching fast and we would like to have confirmation of your intended dates. We schedule these on a first come first served basis and cannot be held to account if you do not let us know in advance. Please inform the office via phone, text, or email ASAP.

As previously stated, our 2024/25 published prices will need to increase slightly from 1 April 2024. You will receive your annual services quotation for your vessel in this month together with your contract to sign and return.

Whilst on the subject of fees and charges as there has been some confusion regarding "storage ashore". We would like to reiterate that pontoon moorings and swinging moorings **include** winter storage ashore, whether paid for annually or monthly. Haul outs, pressure washing, and mast works is at an additional cost and billed separately.

We shall be commencing some mud washing in an attempt to gain more tidal access. It has built up considerably over the winter and the rill has moved slightly so please take a good look at low tide for the deep water close to the marina. The channel markers will be re positioned when we do the moorings checks. The ongoing maintenance and general pontoon refurbishments will hopefully be concluded as well as finishing up the new water and electrical supplies.

The Bar is now under new management, Keith having retired. The refurbishment has been completed and they are offering both a Café facility in the mornings with a lunchtime and evening service. Please give it a try and support this new venture. We all have and have to say the grub is very good!

Yours sincerely,

The Crew
